Layered Approach to Security

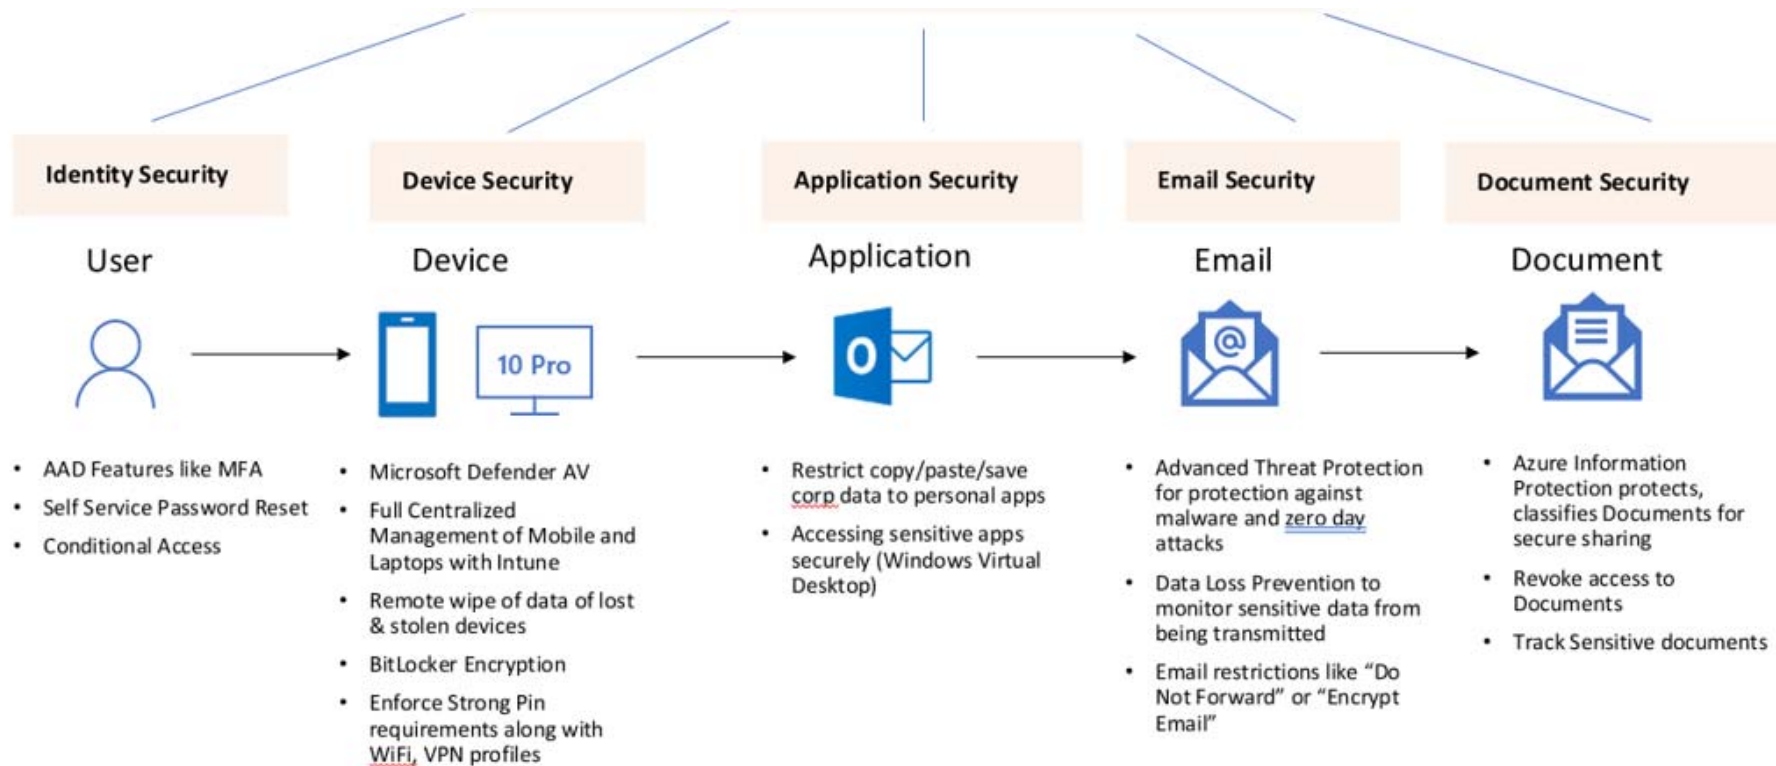

Security Issues at each Layer

Why Microsoft 365 Business Premium?

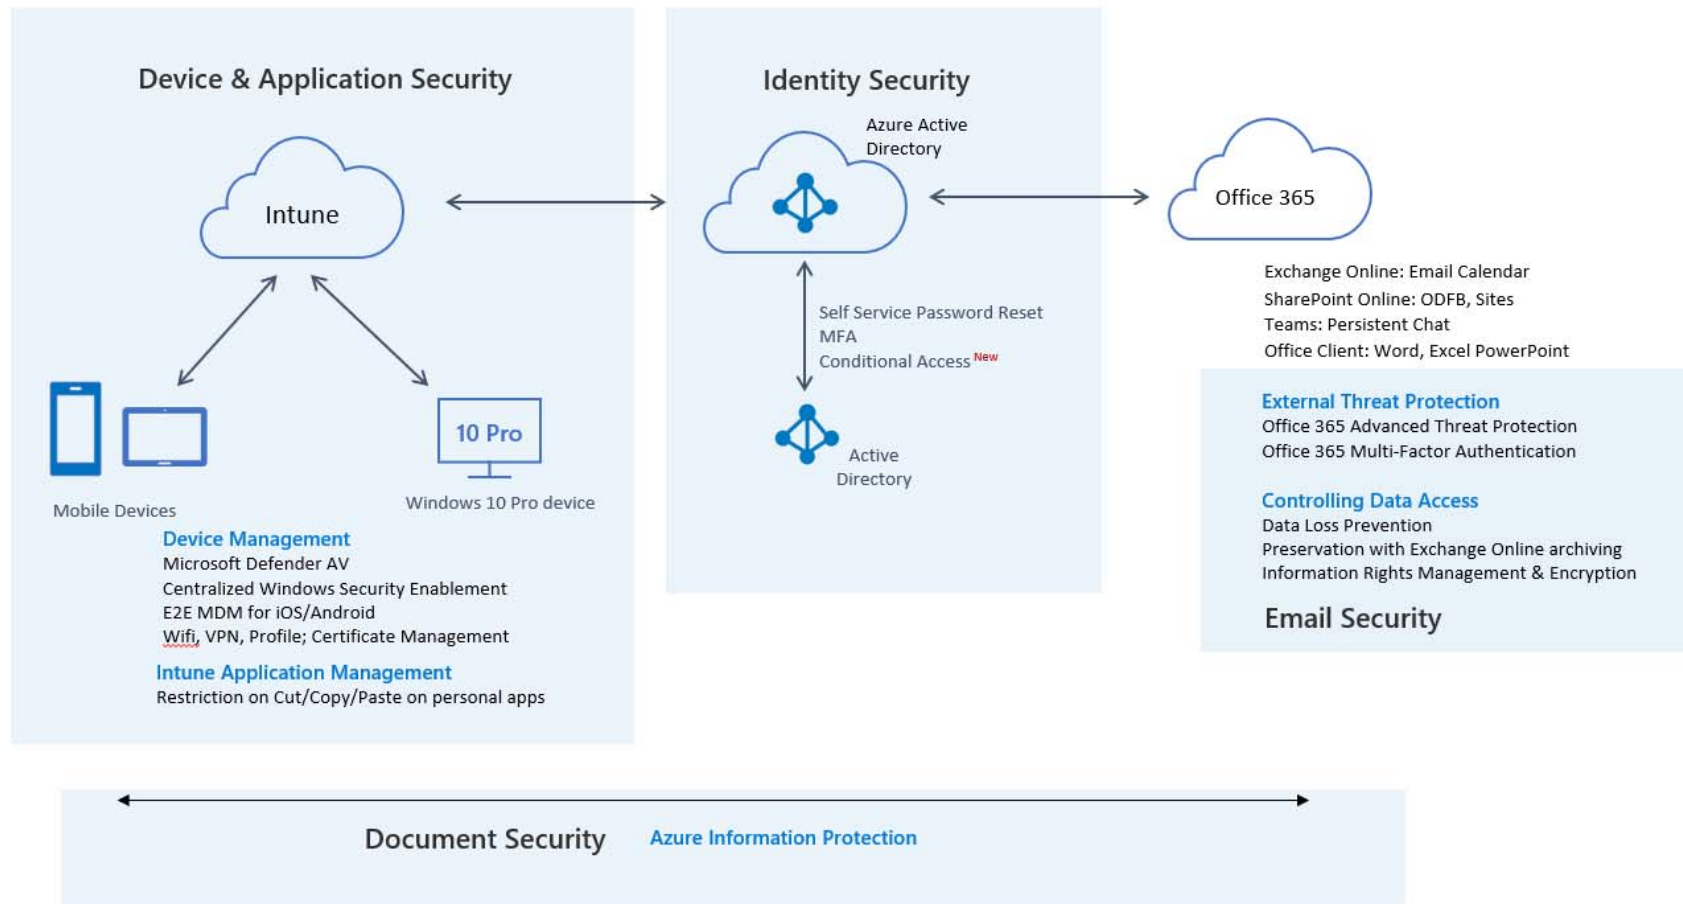

Securing each and every Layer

Microsoft 365 Business Premium

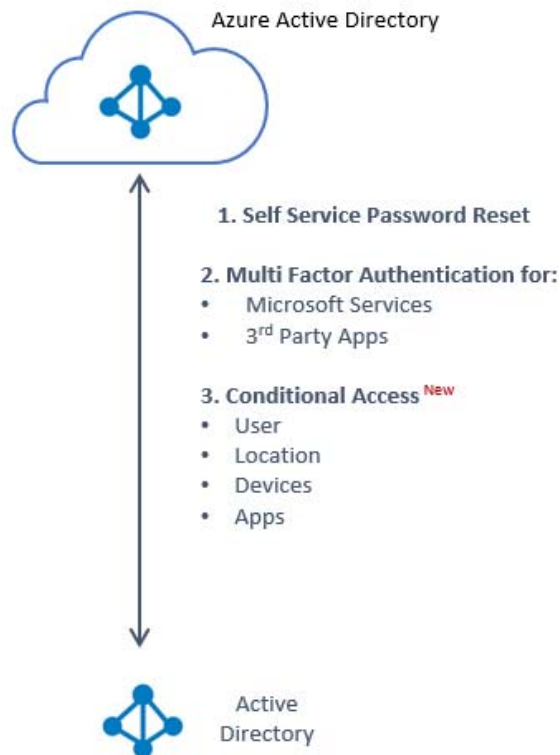

Why Microsoft 365 Business Premium?

Securing each and every Layer

Why Microsoft 365 Business Premium?

Protect the Identity

Hybrid Configuration

AAD Connect enables a single username/password for cloud and on premises apps

Self Service Password Reset with writeback

Let's your users change password easily and that's written back to AD to maintain uniform Password Policies

MFA for additional security for:

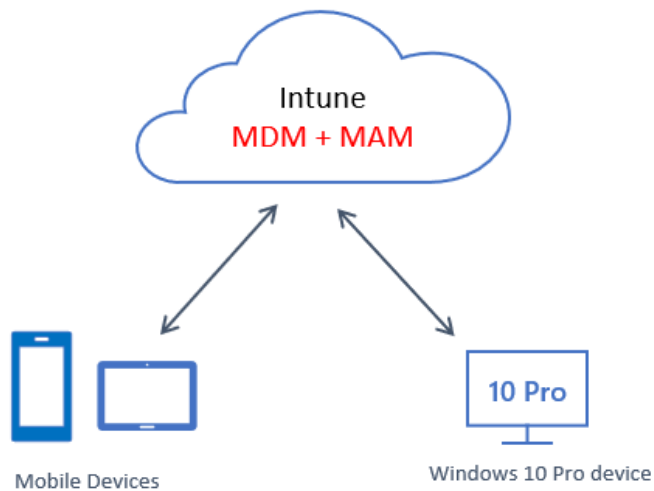

Microsoft Services (incl. Office 365 Services)
3rd Party Apps

Conditional Access

Enforce access controls based on location, user state, device state and apps

Why Microsoft 365 Business Premium?

Device and Application Security

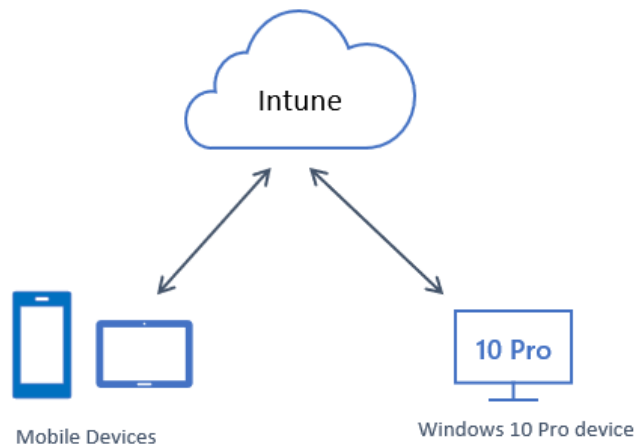

Intune does two things:

1. **Device Management** For Windows & Mobile Devices
2. **Mobile Application Management** for iOS & Android

Why Microsoft 365 Business Premium?

Device Management - Intune

- Device Registration
- Certificate Management
- Wifi, VPN Profile
- Device Wipe for Stolen Devices

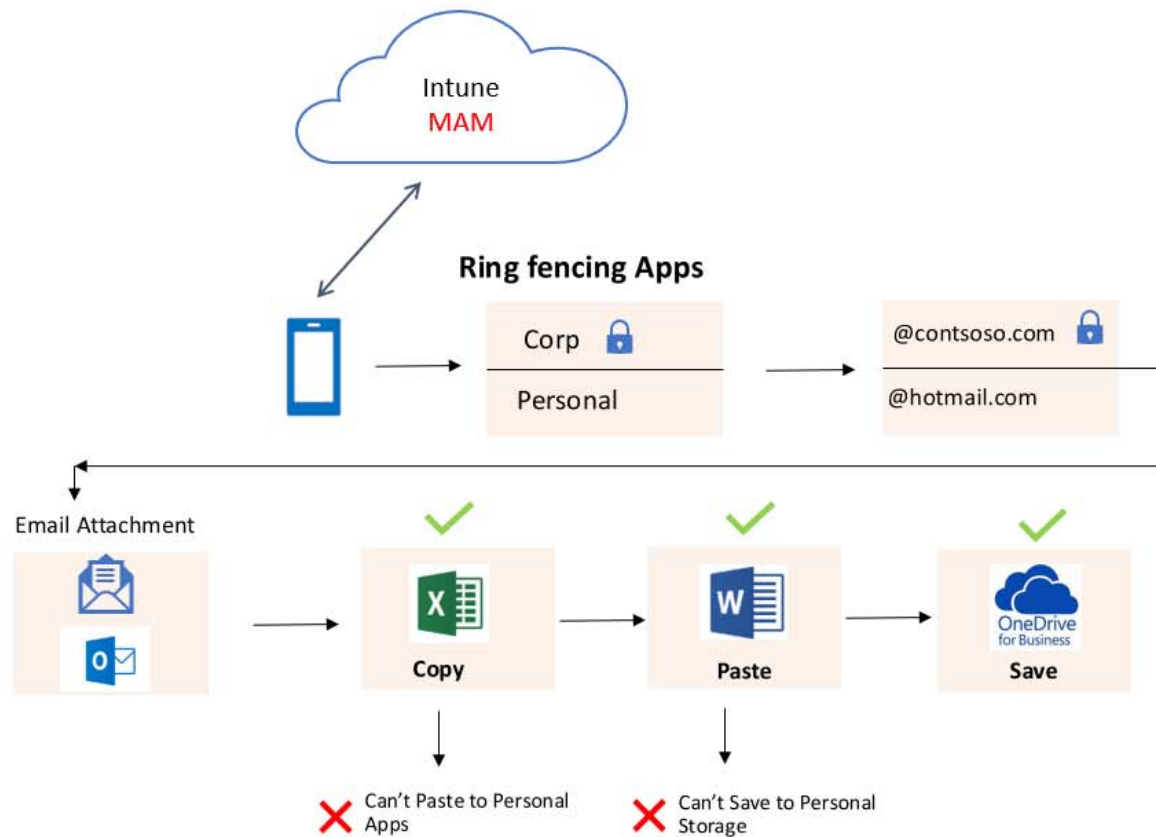

1. Device Management For Windows & Mobile Devices:

End to End Device Management for Mobile and Windows Devices:

- Device Registration
- Certificate Management
- Wifi, VPN Profile
- Device Wipe for Stolen Devices

Why Microsoft 365 Business Premium?

Application Security - Intune

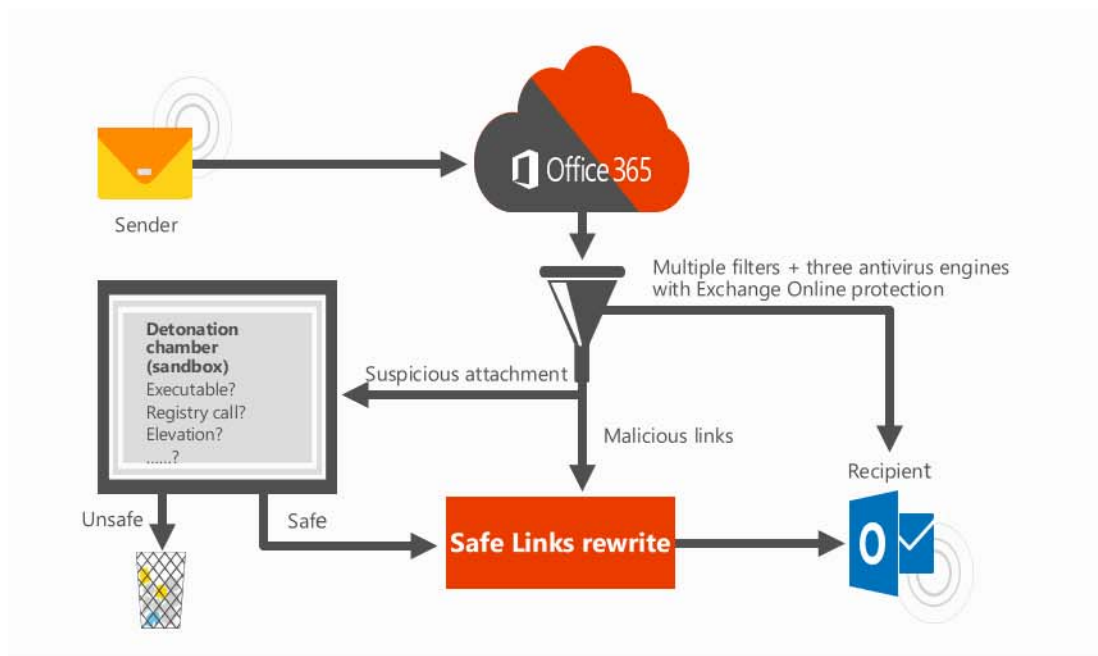

Intune does two things:

2. Mobile Application Management for iOS & Android

- Restricting Cut/Copy/Paste/Save on Personal apps

Why Microsoft 365 Business Premium?

Why Microsoft 365 Business Premium?

Document Security

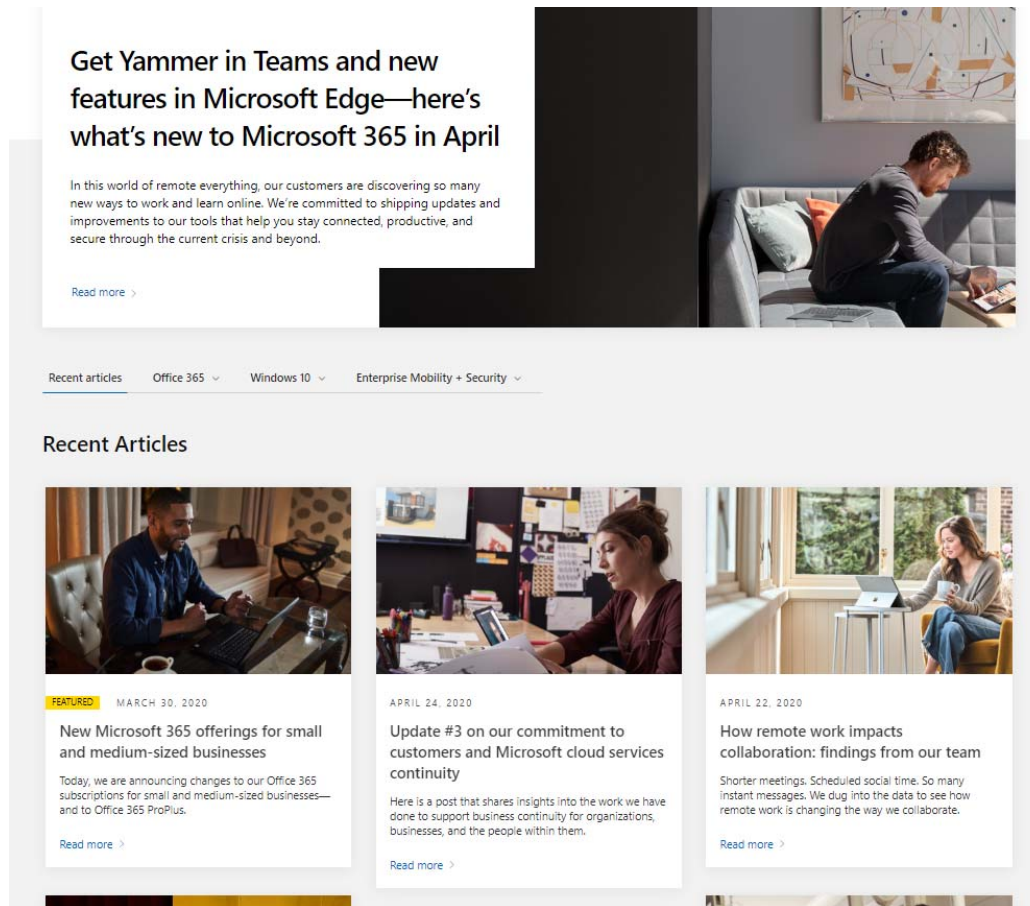

Azure Information Protection

- Classification & Labeling:
 - Manually Classify documents based on labels like "Highly Confidential" that is associated with a certain group access
- Encryption: The encryption follows classification labels
- Tracking: who/where document is accessed
- Revoke access previously granted

Microsoft 365 Blog

<https://www.microsoft.com/en-us/microsoft-365/blog/>

The screenshot shows the Microsoft 365 Blog homepage. At the top, there is a featured article titled "Get Yammer in Teams and new features in Microsoft Edge—here's what's new to Microsoft 365 in April". The article text reads: "In this world of remote everything, our customers are discovering so many new ways to work and learn online. We're committed to shipping updates and improvements to our tools that help you stay connected, productive, and secure through the current crisis and beyond." Below the text is a "Read more >" link. To the right of the text is a photograph of a man sitting on a couch, working on a laptop. Below the featured article is a navigation bar with links for "Recent articles", "Office 365", "Windows 10", and "Enterprise Mobility + Security". Below the navigation bar is a "Recent Articles" section with three article cards. The first card is titled "New Microsoft 365 offerings for small and medium-sized businesses" and is dated "MARCH 30, 2020". The second card is titled "Update #3 on our commitment to customers and Microsoft cloud services continuity" and is dated "APRIL 24, 2020". The third card is titled "How remote work impacts collaboration: findings from our team" and is dated "APRIL 22, 2020". Each card includes a brief summary and a "Read more >" link.
