MANAGED ENDPOINT SECURITY · IRELAND

CyberProtect Endpoint

MANAGE | SECURE | PROTECT

Every laptop, desktop and server. Watched, patched and protected.

Anti-virus, EDR, ransomware detection, patching and DNS filtering in one product, run for you by IT.ie, with a 24/7 Security Operations Centre in Pro.

IT.ie | Unit 01, Dublin Airport Logistics Park, Elm Road, St Margaret's, Co Dublin, K67 N237 | hello@it.ie

What is CyberProtect Endpoint?

IT.ie's managed security for every laptop, desktop and server in your business. It stops malware, catches attacks that slip past anti-virus, keeps Windows and your apps patched and blocks dangerous websites. IT.ie runs it all for you from Ireland.

PROTECTS	EDITIONS	MANAGED BY	WORKS WITH
Windows laptops, desktops and servers	Essentials, or Pro with a 24/7 SOC	IT.ie, with local Irish support	Microsoft 365 Business Standard and Premium

Manage. Secure. Protect.

The three words on the box are the three jobs Endpoint does on every device, every day.

MANAGE

Devices that stay healthy and up to date

Many attacks use a security hole that already had a fix. IT.ie keeps every device patched and watched, so those holes close before anyone can use them.

Remote monitoring & management
IT.ie sees device health and fixes issues remotely.

Patch management
Windows updates applied and tracked.

Third-party software management
Browsers, PDF readers and everyday apps kept current.

SECURE

Dangerous websites never load

One click on a fake login page is all an attacker needs. DNS filtering checks every web address before it opens and blocks the known bad ones, on or off the office network.

DNS filtering
Stops staff reaching phishing and malicious sites.

Anti-virus protection
Blocks known malware before it can run.

PROTECT

Attacks caught and contained, fast

Anti-virus only knows yesterday's threats. EDR watches what programs actually do, so ransomware is stopped and the device isolated before damage spreads.

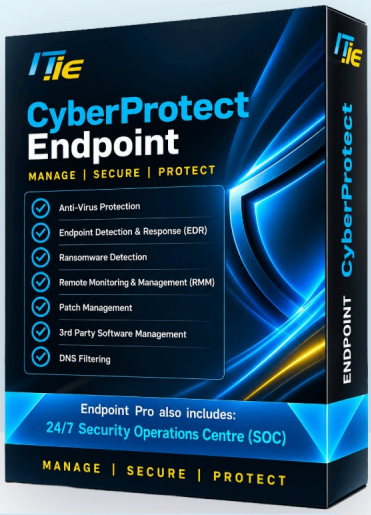

Endpoint detection & response (EDR)
Spots and contains attacks that get past anti-virus.

Ransomware detection
Watches for ransomware and acts to stop it.

24/7 Security Operations Centre PRO
Analysts watching for threats around the clock.

Essentials or Pro

Both editions protect, patch and monitor every device. Pro adds people: security analysts on watch around the clock.

FEATURE	ESSENTIALS	PRO

Endpoint detection & response (EDR)	✓	✓
Ransomware detection	✓	✓
Remote monitoring & management	✓	✓
Patch management	✓	✓
Third-party software management	✓	✓
DNS filtering	✓	✓
24/7 Security Operations Centre (SOC)	Not included	✓

24/7

Why businesses choose Pro

Attacks don't keep office hours. Ransomware is often launched overnight or at the weekend, when nobody is watching. With Pro, a Security Operations Centre watches for you, 24 hours a day, 7 days a week.

When ransomware strikes a laptop

ILLUSTRATIVE

Detected
EDR flags unusual file encryption.

Stopped
The malicious process is terminated.

Contained
The device is isolated from the network.

Recovered
IT.ie investigates, cleans up and tells you what happened.

Built to sit alongside Microsoft 365

Whichever Microsoft 365 plan you are on, CyberProtect Endpoint adds what it leaves out.

ON BUSINESS STANDARD

Standard doesn't include advanced endpoint security. Endpoint fills that gap.

- Adds EDR and ransomware detection to every device
- Addresses endpoint items flagged in your Microsoft Secure Score
- Helps raise your Secure Score

ON BUSINESS PREMIUM

Premium includes strong tools such as Defender and Intune. Endpoint adds the everyday management around them.

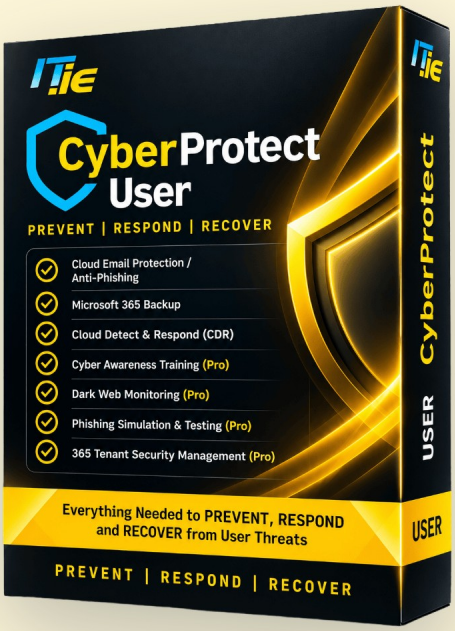

- Managed Windows and third-party patching
- DNS filtering and remote monitoring by IT.ie
- 24/7 SOC monitoring with Endpoint Pro

Endpoint and NIS2

NIS2 Article 21 lists the security measures in-scope organisations must take. CyberProtect Endpoint supports several of them on your devices.

21(2)(b)	**Incident handling**	EDR, ransomware detection and the 24/7 SOC (Pro).
21(2)(e)	**Vulnerability handling**	Patch management and third-party software management.
21(2)(g)	**Cyber hygiene**	DNS filtering and anti-virus on every device.
21(2)(i)	**Asset management**	Remote monitoring & management shows every device you have.

No product makes a business compliant on its own. Governance, policies and risk management matter too, and IT.ie can help with those.

THE OTHER HALF OF THE SHIELD

Endpoint protects devices. User protects people.

Many attacks start in an inbox, not on a device. CyberProtect User protects your people, inboxes and Microsoft 365 data, so one bad email or stolen password doesn't become a business-stopping event.

PREVENT | RESPOND | RECOVER

What CyberProtect User adds

Cloud email protection / anti-phishing

Filters phishing, malware and impersonation emails.

Microsoft 365 backup

Email, OneDrive, SharePoint and Teams, backed up.

Cloud Detect & Respond (CDR)

Spots hijacked Microsoft 365 accounts.

Cyber awareness training PRO

Short, regular training that helps staff spot scams.

Phishing simulation & testing PRO

Realistic test emails show who needs more help.

Dark web monitoring PRO

Alerts you when company credentials turn up online.

365 tenant security PRO

Ongoing management of your Microsoft 365 security settings.

Why take both?

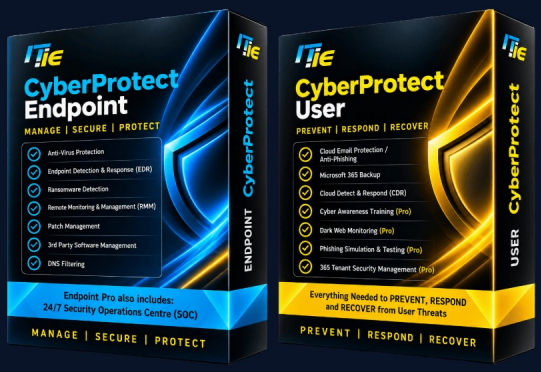

STARTS WITH A PERSON

A phishing email or a stolen password. CyberProtect User stops it at the inbox and the account.

ENDS ON A DEVICE

Ransomware encrypting a laptop. CyberProtect Endpoint catches and contains it.

Explore User at it.ie/cyberprotect/user

Protected in three steps

From first conversation to fully managed devices, with as little disruption to your team as possible.

Step 1

Assess

A free security assessment shows where your devices are exposed and which Endpoint edition fits.

Step 2

Deploy

IT.ie deploys the CyberProtect Endpoint agent to your devices with minimal disruption.

Step 3

Protect and support

From then on IT.ie monitors, patches and supports your devices from Ireland.

Book your free security assessment

We'll show you where you're exposed today and which Endpoint edition would close the gaps. No obligation.
